Summary

Frontend-focused Computer Science senior with hands-on experience in React.js, TypeScript, and TailwindCSS. Passionate about creating fast, intuitive, and scalable web applications. Seeking opportunities **(Full-time, Part-time, internship)** to apply technical expertise, collaborate with experienced teams, deliver high-quality user experiences and refine skills in modern frontend frameworks and best practices.

Education

6th Of October University - B.Sc. in Computer Science

GPA: 3.06 / 4.0 | Expected 2026 | 4th Year

Experience

Customer Service Agent

BDO Esnad (Client: *Vodafone Egypt*) | **May 2024 - Aug 2024**

- Developed strong time management and communication skills.
- Collaborated with teams to resolve customer issues efficiently.

Training & Courses

Certificates:

- TypeScript (MaharaTech) – [Certificate.pdf](#)
- EF SET English Certificate (Level C2) – [Show Credentials](#)

(Additional university-led training in Cyber Security, Data Science, Networking, Java, and C++)

Projects

Titan MMA Gym

- Built a full-stack booking system designed to represent a Mixed Martial Arts gym. The primary purpose is to showcase the gym's classes, coaches, students, branches, and offerings - while also allowing users to sign-up and book training sessions via the plans page.
- Implemented authentication (Clerk), data management (Convex), and responsive UI with Material UI.
- Managed state and data fetching using Redux and React Query.

Tech: React, TypeScript, TailwindCSS, Redux, React Query, Material UI, Clerk, Convex, Webpack.

Live app: [[titan-mma.app](#)] | **View on GitHub**: [[Titan-MMA Repo](#)]

ChessTimesSquare

- Built an online chess clock for over-the-board games with dual timers with real-time countdowns.

- Added preset/custom time controls, custom color palettes, dashboard page to track match results, and rating fetch (using Axios) from Chess.com and Lichess.

  Tech: React, JavaScript, CSS, Context API, Axios.

  Live app: [chess-times-square.app] | **View on GitHub**: [ChessTimesSquare Repo]

Notary

- Built a note-taking application with create, edit, archive, and customizable colored tags.

- Enhanced user experience with smooth animations and modern UI components (Shadcn/UI).

- Implemented client-side routing for seamless navigation using Context API.

  Tech: React, TypeScript, TailwindCSS, Context API, Shadcn/UI, Framer Motion.

  Live app: [notary.app] | **View on GitHub**: [Notary Repo]

Technical Skills

Frontend Core:

- HTML5
- CSS3
- JavaScript
- Responsive Design

Frameworks & Libraries:

- React.js
- Tailwind CSS
- TypeScript
- React Router
- Redux
- React Query
- Material UI
- shadcn/UI

Tools:

- Git & GitHub
- Docker

Languages:

- Arabic (Native)
- English (C2 – EF SET Certified)
- Spanish (Basic Knowledge)
